

This Bar Code Tells You We are Committed to Your Safety

This familiar little bar code says a lot.

It tells you that when it comes to your safety, we mean business.

It tells us we're doing everything we can to be sure that:

- You're getting *your* medication in the *right* dose and at the *right* time,
- This isn't a drug you have a known allergy to, and
- This drug shouldn't cause problems with any other medicines you're taking.

Medication errors are one of the main causes of *preventable injuries* in hospitals. The computer-based eMAR & Bar Coding system is a *triple-check precaution* against these injuries. It's only available in a handful of hospitals in the nation:

And we're one of them.

Count on us. Always.
